

I was just informed that the FCC is trying to stop XM Satellite Radio from broadcasting traffic and weather channels. Believe me, these channels are greatly appreciated because subscribers can get continuous updates to assist them in their travels. XM is commercial free, and provides variety and quality that are not available anywhere else. Many people pay for this service and shouldn't be denied this right. The National Association of Broadcasters should not be able to dictate what people hear. Are we forgetting the First Amendment? So I urge you to reject the NAB petition 04-160, and let people hear what they want and deserve to hear.
